Tower of Babel

Welltool
Challenges language barriers
to create a world of
mutual understanding

Changes to any country's language via QR code

At hotels or Japanese inns.

In menus

You can make a QR code with Wellpage!

When you read the QR code...

In products

In catalogues

...the contents written will be automatically translated in the language that person is using

Welltool's multilingual group chat : WellChat

Shows the original text and the translation at the same time.

Welltool's instant translation feature in the SDGs

**In order to accomplish
all of the goals set in
the SDGs by 2030...**

Challenge for the SDGs

**We provide a never before seen next generation
world communication platform where all
countries can cooperate more effectively**

SDG 13 : Precise countermeasures against climate changes

■ You can communicate with people who don't speak your language in emergency situations.

If an earthquake or natural disaster occurs.

Free

With the multilingual chat, even foreigners who don't know the language can receive information about emergency situations, shelters, food provisions and people count.

SDG 3 :Ensure healthy lives and promote wellbeing for all at all ages

■ You can now communicate with foreigners who can't speak your language even in the closed environment of a hospital.

You can still commence meetings even when the number of foreign doctors and nurses keeps growing.

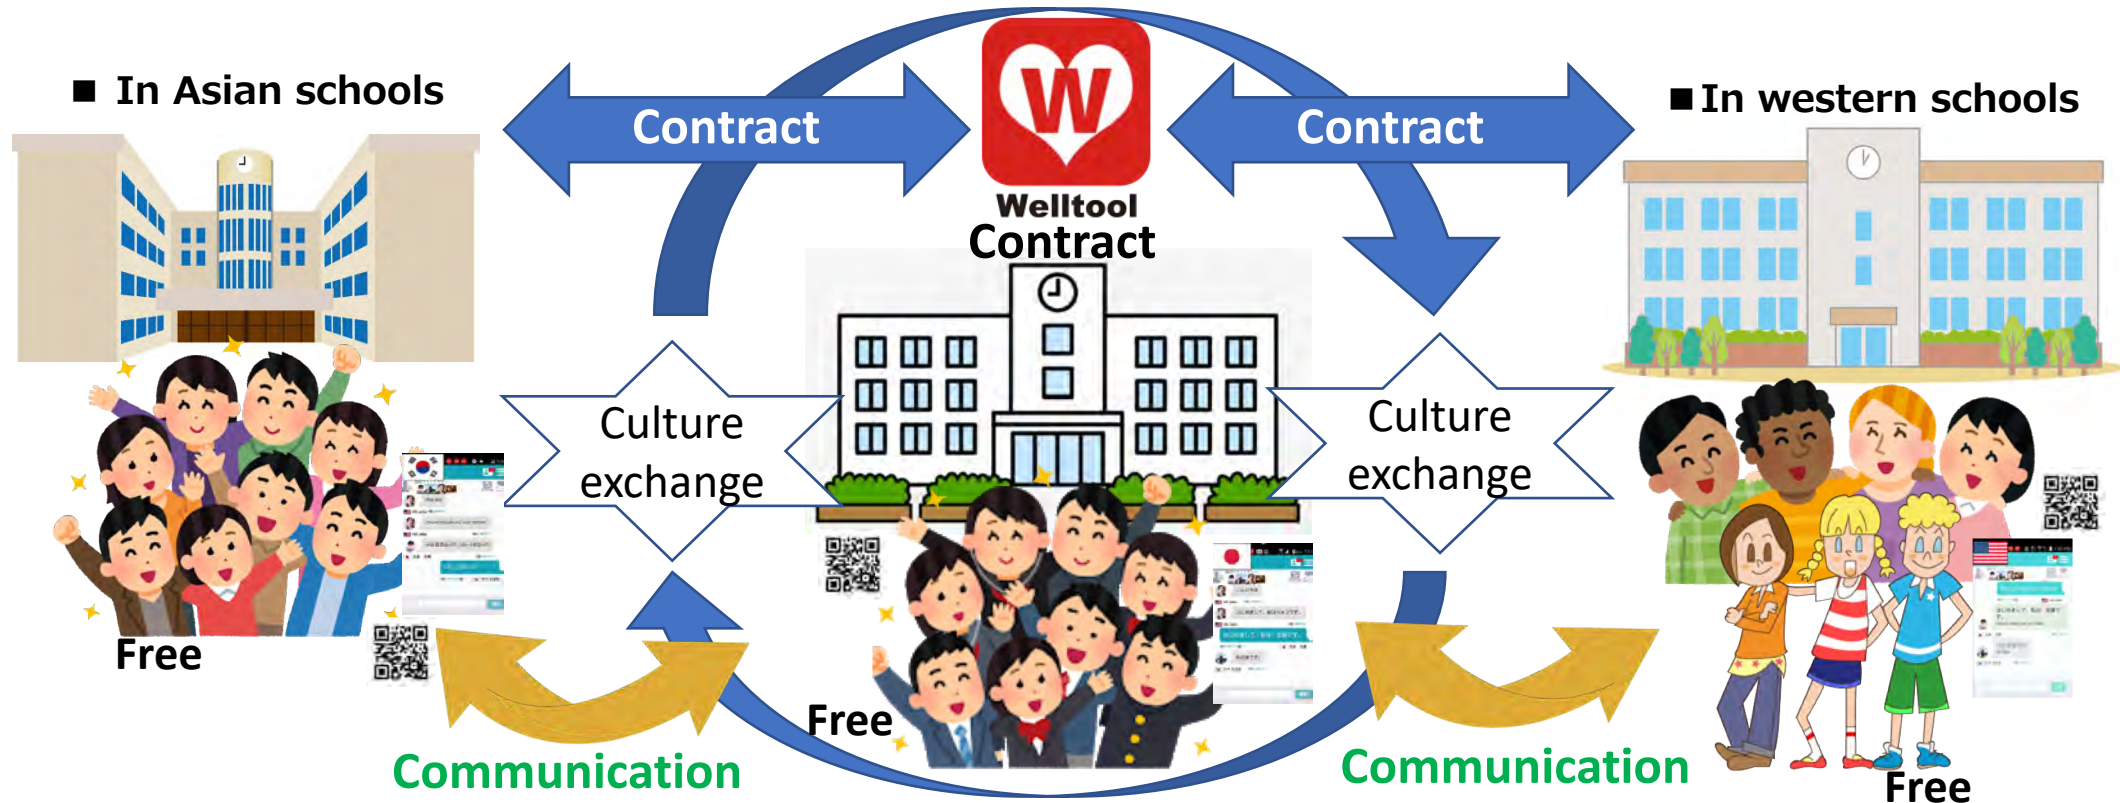

SDG 4: Ensure inclusive and equitable quality education

■ Use the chat a cultural bridge to communicate with foreign schools and cooperate with students to achieve the goal!

Towards a rich and vibrant future.

A truly moving experience exchange program.

Challenge for the SDGs

Thank you.
