# WTA WORKSHOP:

LEO/MEO Constellations and the Teleport  
10:45-12:00

**Moderator:**

- **Bruce R. Elbert**, President, Application Technology Strategy

**Panelists:**

- **Ronald van der Breggen**, CCO, LeoSat
- **Michael DiPaolo**, VP, Business Development, Comtech EF Data
- **Chris Faletra**, Teleport Sales Director

# Non-GEO Developments

- US FCC grants multiple licenses; other nations following suit (e.g., China)
- OneWeb started early, appears to be in production
- LeoSat aggressively marketing capabilities (on this panel)
- 5G roll out expected post 2020; several test beds coming together
- Teleports are required for key roles (they know operations)
- Antenna and equipment suppliers gearing up for a large market
- GEO operators focusing on HTS with greater capacity for mobile and fixed
- Still, there is uncertainty about “how” and “when”
