Solution Overview

SPACE

POWER

CONNECTIVITY

Space.

DataGryd's iconic 60 Hudson Street customizable data center facility offers 120,000 square-feet of available colocation space, the largest single footprint data center space available anywhere in New York City.
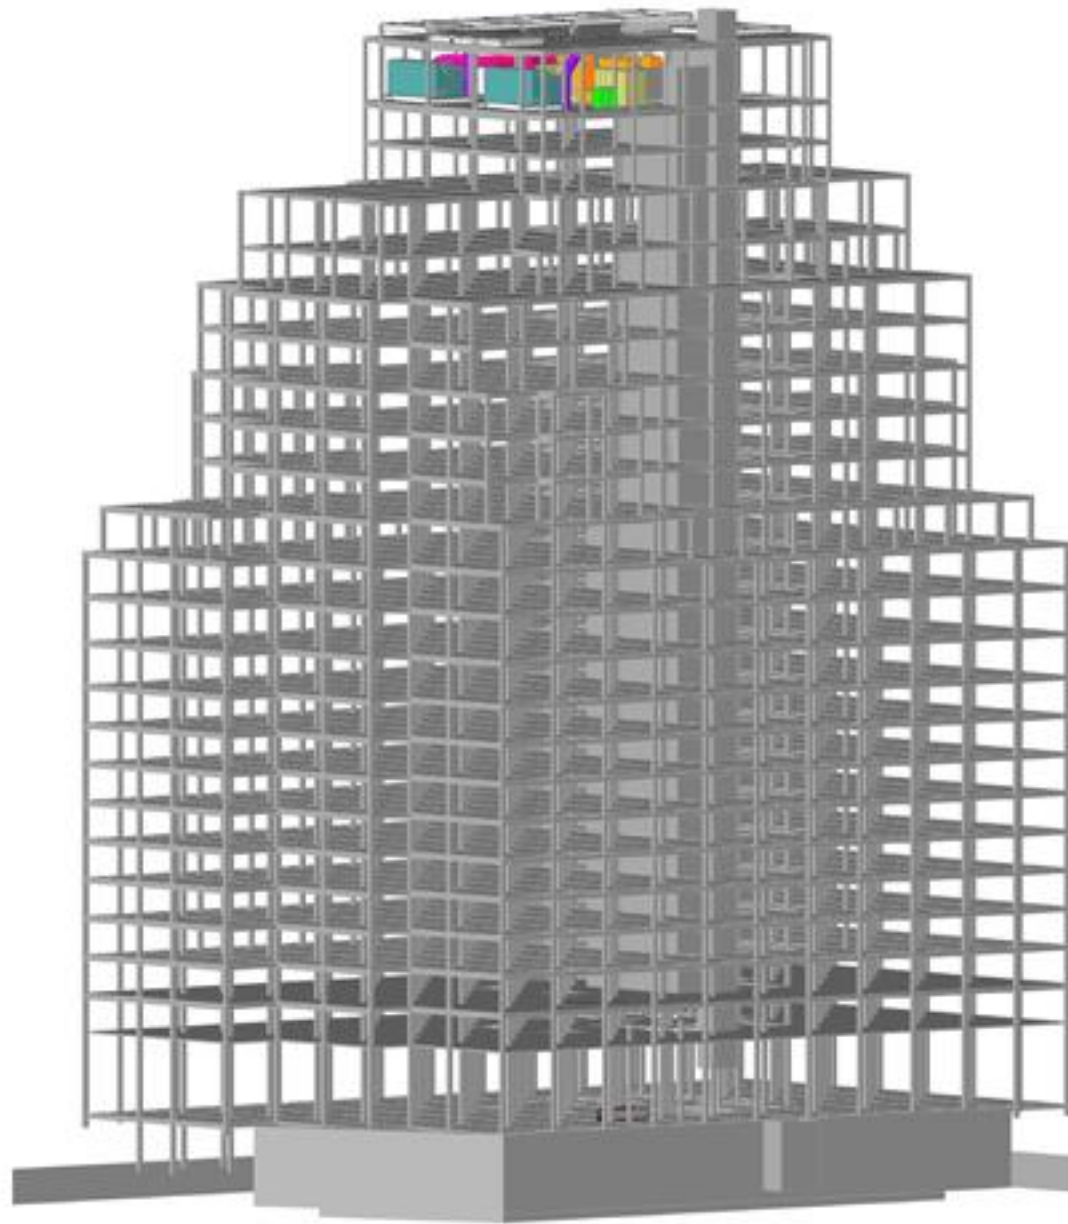

Power.

DataGryd's high-density colocation space uses a proprietary MicroGryd™ technology, offering dual contingencies and delivering the highest value in energy efficiency with direct primary utility feeds offering up to 12,000 kW of power.

Connectivity.

DataGryd's data center also provide access to over 300 interconnected carriers and exchanges located throughout the iconic building. Connectivity is delivered at a fraction of the cost of other data center cross-connect fees, saving companies tens of thousands of dollars.

- Raised floor or on slab construction turn-key built to suit (options to customize available)
- MicroGryd™ of Utility Grade Power: Delivered in any voltage from 48 volts DC to 13,200 volts AC
- UPS and Battery Backup: N+1
- Full mission-critical back up

DATAGRYD™
DATA CENTERS | SIXTY HUDSON
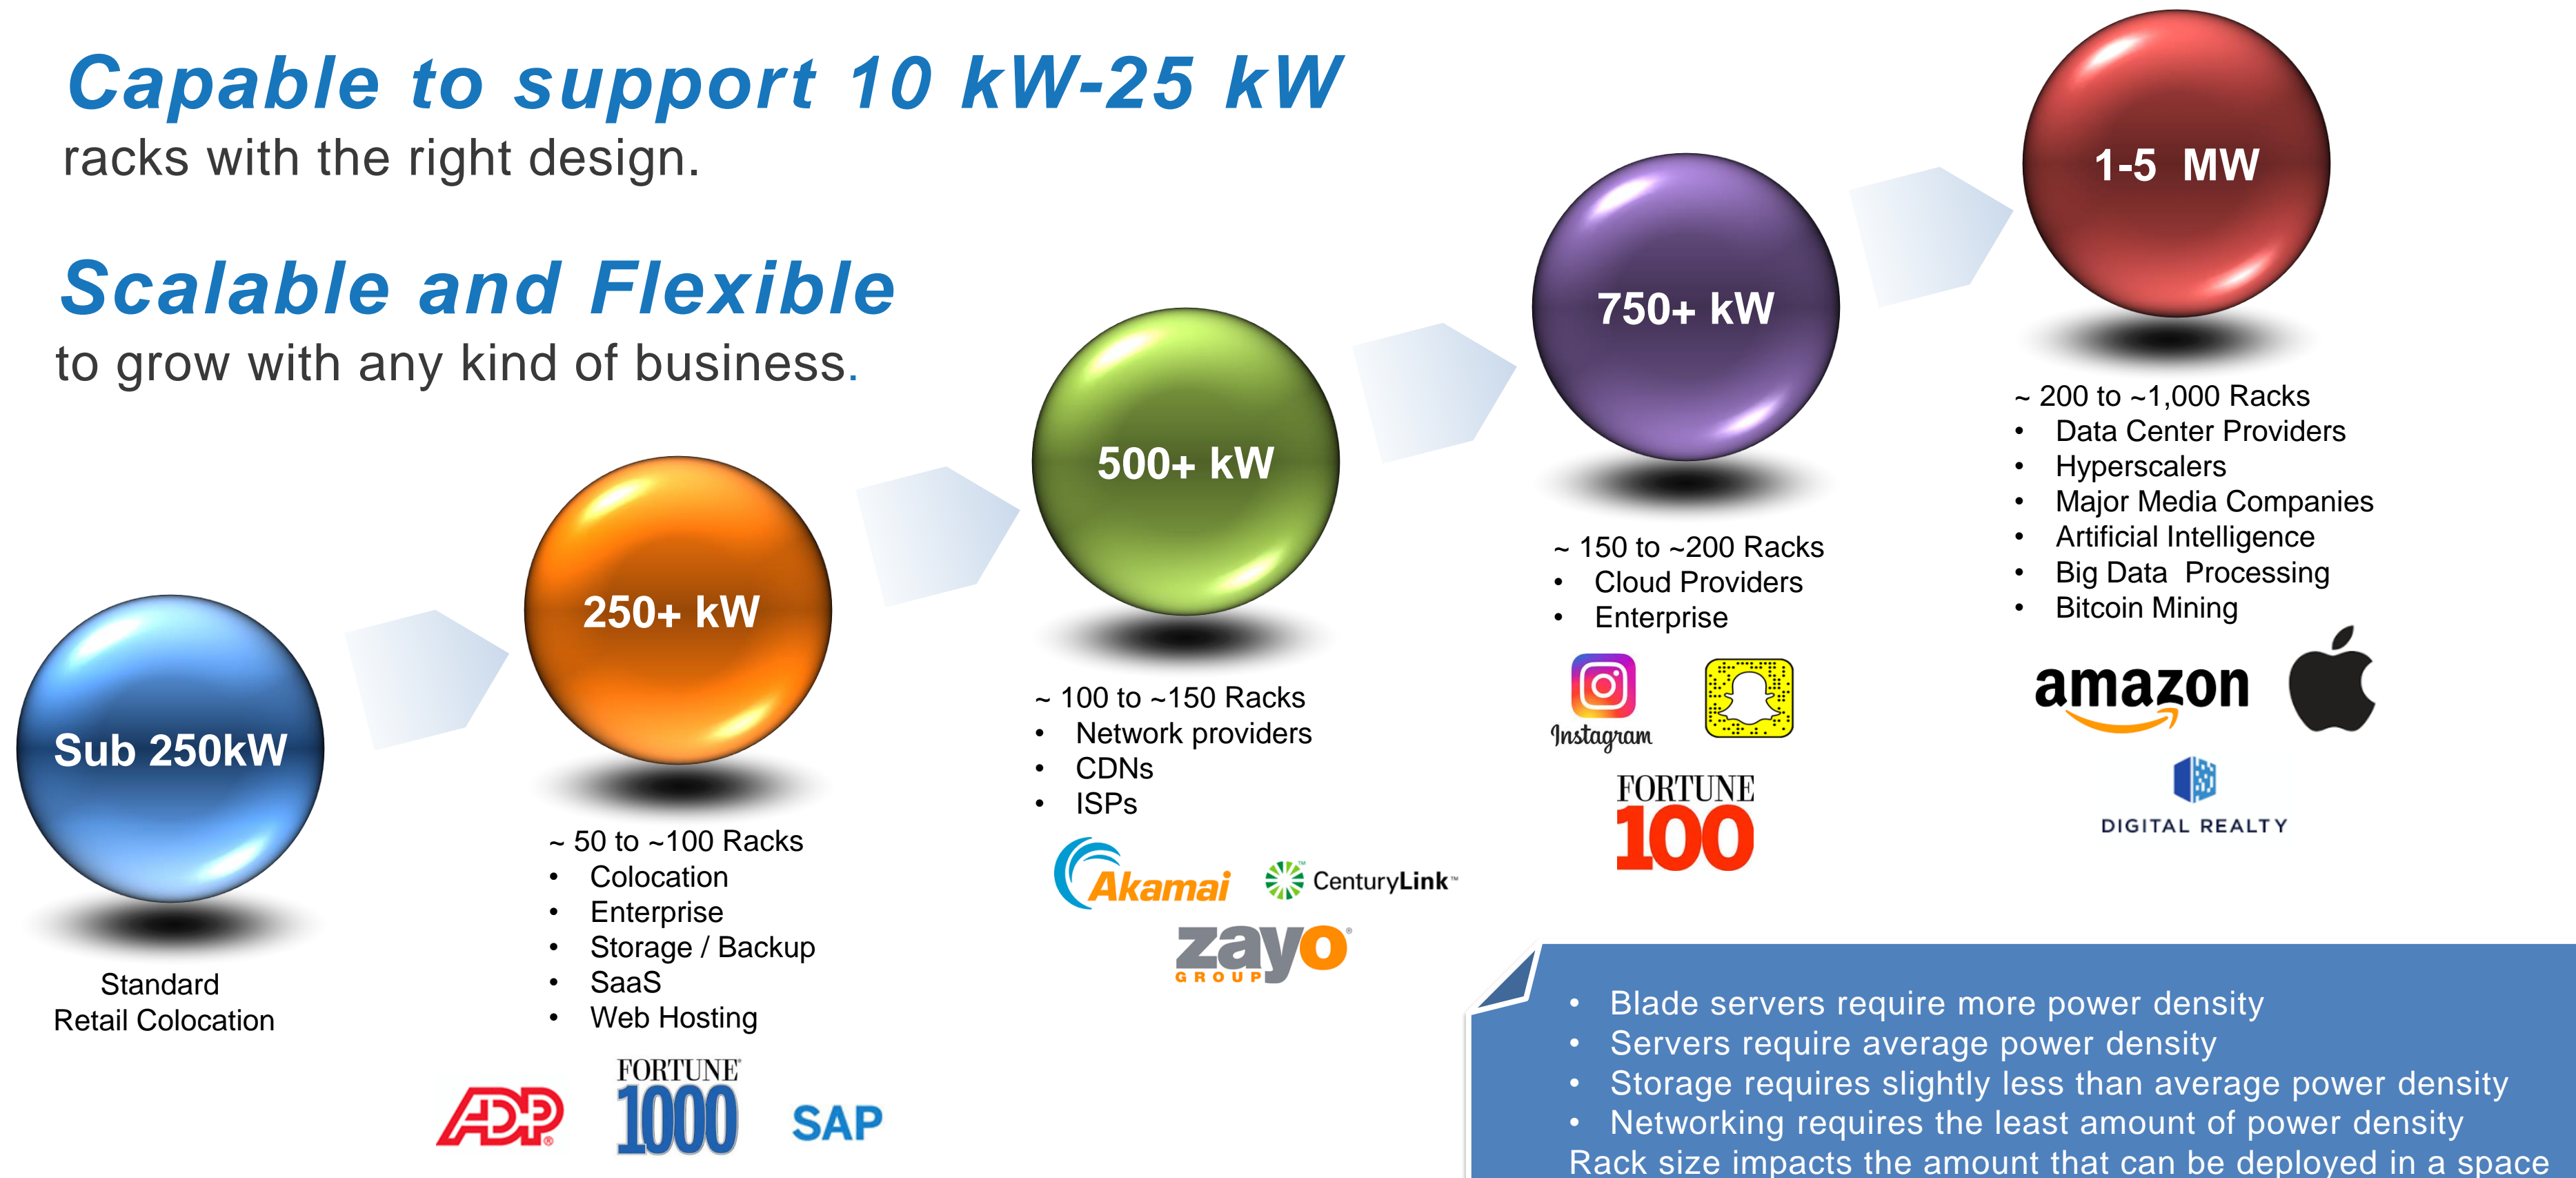

Serving Diverse Needs
Customized Colocation / Data Center Space

Capable to support 10 kW-25 kW
racks with the right design.

Scalable and Flexible
to grow with any kind of business.

Sub 250kW

Standard
Retail Colocation

250+ kW

~ 50 to ~100 Racks
- Colocation
- Enterprise
- Storage / Backup
- SaaS
- Web Hosting

500+ kW

~ 100 to ~150 Racks
- Network providers
- CDNs
- ISPs

750+ kW

~ 150 to ~200 Racks
- Cloud Providers
- Enterprise

1-5 MW

~ 200 to ~1,000 Racks
- Data Center Providers
- Hyperscalers
- Major Media Companies
- Artificial Intelligence
- Big Data Processing
- Bitcoin Mining

- Blade servers require more power density
- Servers require average power density
- Storage requires slightly less than average power density
- Networking requires the least amount of power density

Rack size impacts the amount that can be deployed in a space

DataGryd is Affiliated With:

Target Market

DataGryd meets the demand for wholesale data center and colocation providers, enterprises, hyperscalers, service and network providers, MSOs, cloud and content providers, mobile and gaming companies, and government entities among others.

Why DataGryd

DataGryd meets the ever-increasing demand for data processing and data storage centers in New York's urban market.

Each suite is tenant-optimized and built-to-suit, assuring low operational and capital expenditures and maximizing clients' capital preservation.

- DataGyrd can service clients from 250 kW to 5MW

- Power feed in and out of the building is diverse from the building itself, which enhances business continuity

- If 60 Hudson Street experiences an outage, DataGryd customers can continue operations
